BRUSHES

SPRIG

Its thinner filaments gives you a smoother finish with water based trim paints

PRO-EXTRA MONARCH

Longer, thicker filaments are perfect for use with oil based paints

SYNTOX

Finest filaments will leave a mirror like finish when working with varnishes & stains

MONARCH ELITE

Picks up & releases more paint for greater productivity on the job

DALE

Square edge ferrule gives you complete control & accuracy when you need it the most

CUB

Our versatile short handled brush. Flagged filaments for increased paint pick-up and professional quality finish

WHAT MAKES A GOOD QUALITY BRUSH

PROPRIETARY TIPPING, FLAGGING AND CHINEX

Increases paint pick up and lay off to ensure maximum performance
Smooth even release

What is a flagged filament?

Each bristle/ filament has a split end increasing paint pick up and lay off. After continual use, most brushes wear out their tipped ends and are only half as efficient, while Purdy brushes continuously self-flag (split) ensuring the brush picks up and lays off as much paint as when it was first bought and maintain its efficiency.

Chinex: has similar performance to China bristle but cleans-up faster and easier, has longer brush-life, and holds its shape and stiffness better.

WOOD PLUGS FOR FULL PAINT CAVITY

Creates reservoir to hold more paint
Aids even distribution of paint flow

EPOXY SETTING

Locks in filaments due to its 7mm thickness, which eliminates filament loss

SIGNED BY THE MAKER

Each brush is hand made, the sticker bares the name of the individual brush maker

STAINLESS STEEL FERRULE

Strengthens brush head through 2 contact points

NICKEL PLATED THREADED NAILS

Secure brush head through 3 contact points

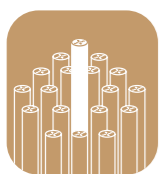

LIGHTWEIGHT ALDERWOOD HANDLE

Absorbs moisture and sweat, to maintain a constant grip on the brush even on hot days when the hand may be sweating, maintaining maximum productivity

Molds to your hand over time

Durable

EVERY PURDY BRUSH...

Includes Chinex filaments as standard

Self flags throughout the life of the brush

No filament loss guarantee

Delivers great results with water and oil based paints

Retains its shape for longer

Exclusively approved by PDA

with global materials

KEEP THE KEEPER

Keepers are more than just packaging, they help brushes last longer.

Purdy® engineers brush bristles to return to their most relaxed state after use. Keepers help by guiding the bristles to return to their original state, maintaining premium form and extending its life.

All Keepers are covered in wax to prevent water penetration and are designed for increased airflow, eliminating the potential for mould development.

PRO-EXTRA MONARCH

With longer, thicker filaments, the Pro-Extra Monarch is perfect for use with oil based paints.

- Thicker filaments hold and lay off more paint than natural bristles
- Lays off 30% more paint than any other Purdy brush improving your productivity
- Handcrafted in USA with Global Materials

RECOMMENDED FOR
USE WITH
OIL BASED PAINTS

Item Number	Size	Case	UPC Code
144234710	1"	6	716341000523

Built by Hand. Trusted by Professionals.

For over 100 years, every Purdy paintbrush has been handcrafted in Portland, USA by skilled brushmakers who know that the right tool makes all the difference. From the bristles to the handle and everything in between, every detail is carefully chosen to deliver a flawless finish and stand up to years of hard work. Built for durability and efficiency, Purdy brushes help painters and decorators work faster, achieve better results, and take pride in every job.
